## Next step

- **3rd call:**

✓ 35,6 millones euros of ERDF

- **1st quarter 2019**

## Project example: PRINCALB

- **Results:** In July 2012, 10,264ha of forest were burned. More than 3,000ha were saved from the fire thanks to the work previously carried out.
- **Signature of an administrative arrangement between the Spanish and French Ministries of the Interior on 20/2/2017**

## Project example : HeliNET

- **Objective:** to reduce the response time in situations of emergency, rescue and natural disasters in the western area of the border (Navarra, Euskadi and the Atlantic Pyrenees) **by using helicopters.**

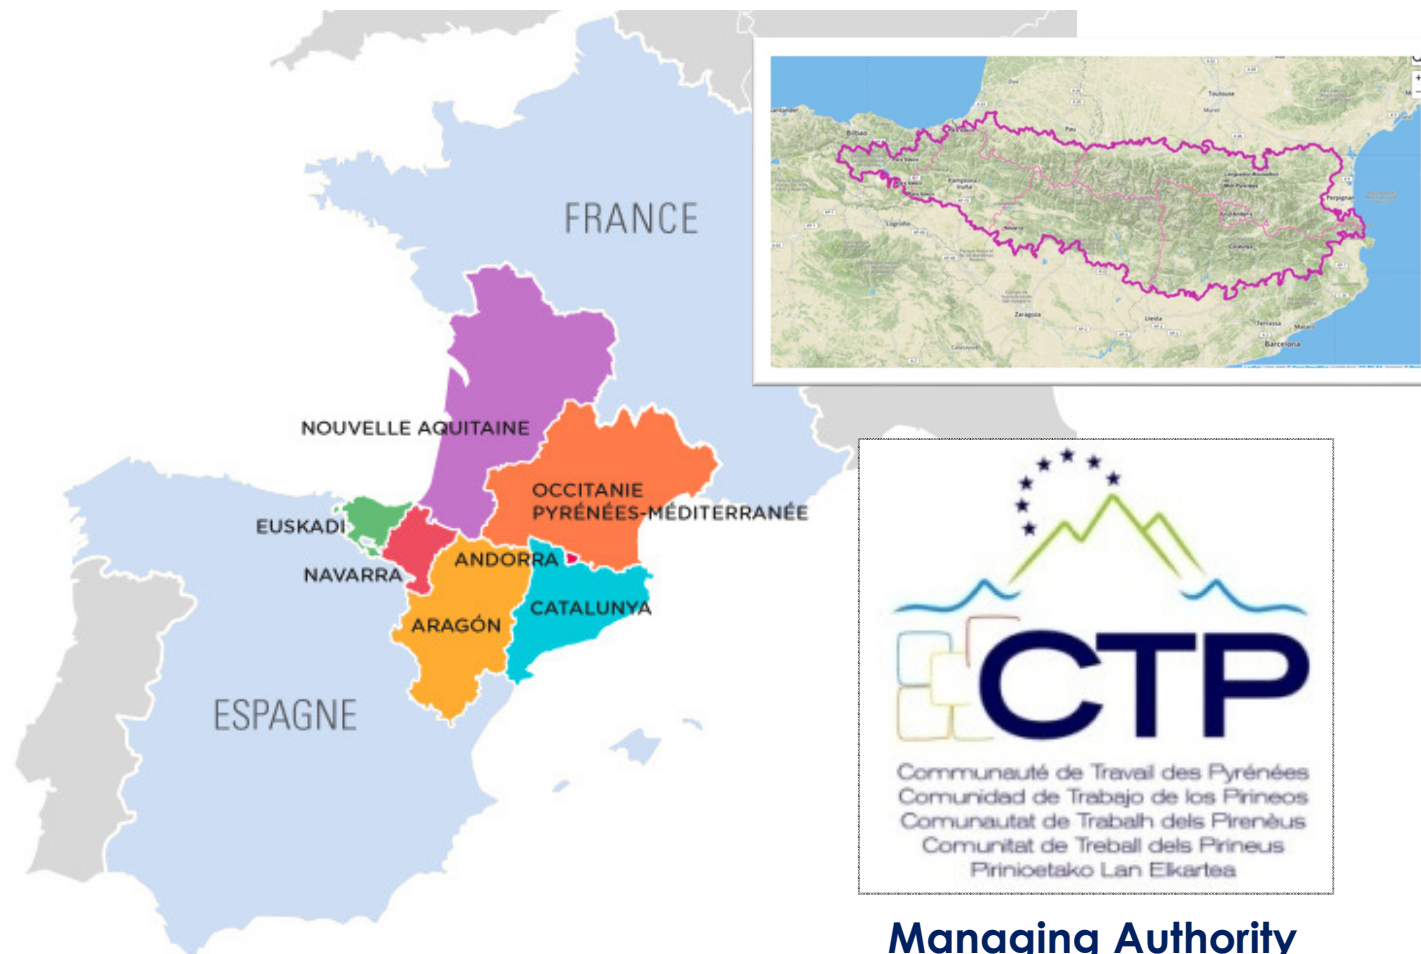

# Project example HeliNET

## Expected results:

- Cross-border Logistics Network of at least 20 Helisurfaces / Heliports;
- Operational Network developing guides, action protocols and tools to help the decision to mobilize assistance vehicles, in help missions on both sides of the border;
- **End with the lack of current administrative, logistical and operational coordination to allow cross-border mutual help actions in regions of both countries (difficult today).**

## Interreg V-A Spain, France, Andorra (POCTEFA 2014-2020)

Programme funded by ERDF

# Overcoming the obstacles

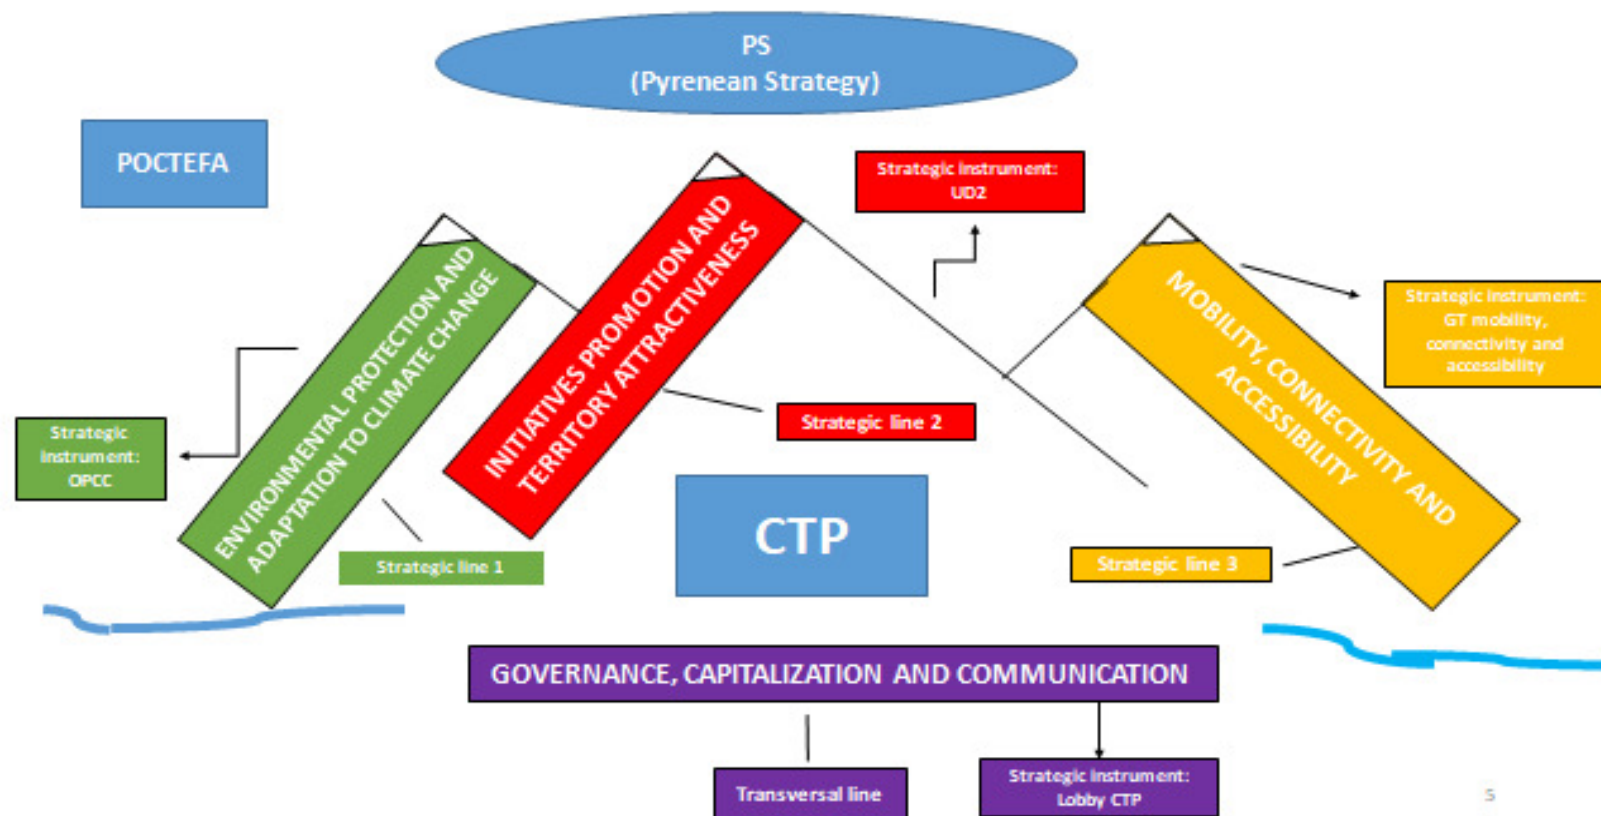

# Working on the weaknesses

- Cross- border accessibility / mobility
- Connectivity
- Aging of the population
- Language barriers for crossborder cooperation execution
- A moderately innovative territory
- Difficulties in attracting companies
- A high rate of unemployment among young people

## why a Pyrenees strategy?

- Recover the original spirit of the CTP
- Develop own activities
- Optimize this exceptional governance tool
- Exploit a window of favorable opportunities
- Act as a macro-region

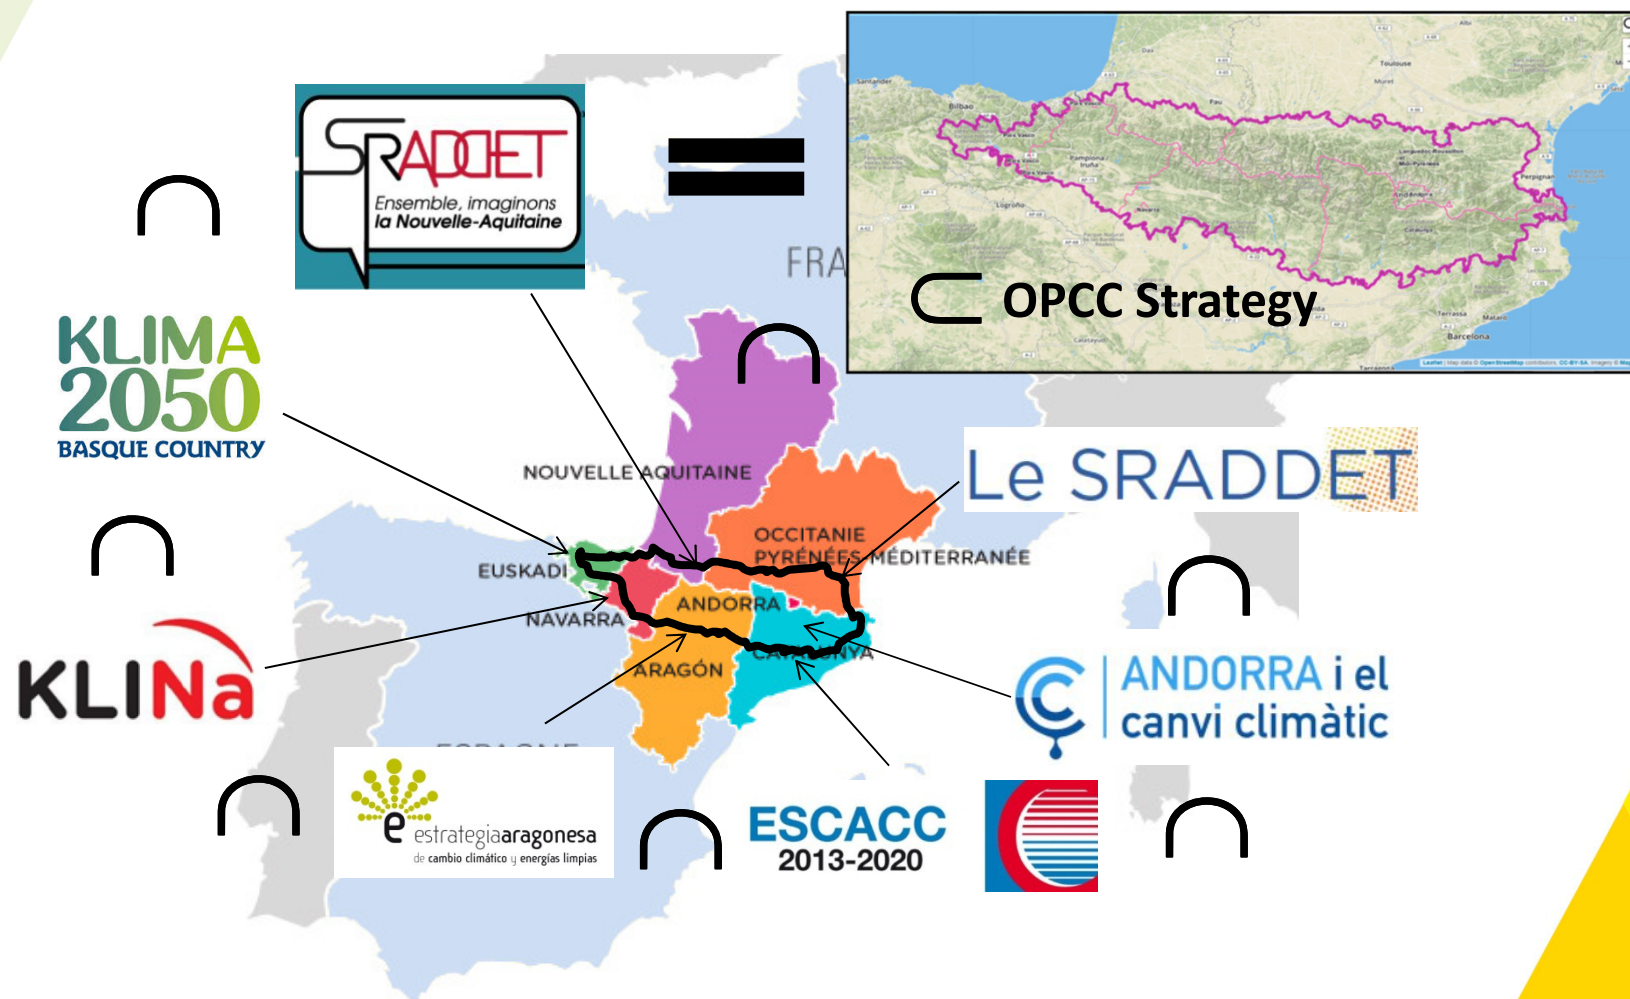

# CTP strategy 2018-2024

# Axis 1: ENVIRONMENTAL PROTECTION AND ADAPTATION TO CLIMATE CHANGE

C.C. adaptation  
in the Pyrenees

With the support of:

**Interreg**  
**POCTEFA**

# Working on the weaknesses

**CTP-POCTEFA can ACT on**

- Promoting local initiatives
- Attractiveness of the cross-border territory

→ **AXIS 2**

**CTP-POCTEFA cannot ACT on**

- Cross- border accessibility / mobility
- Connectivity

→ **AXIS 3**

Axis 2: Pilot project **Health emergencies in the Pyrenees**

## The legal obstacle

Merely not being registered with the Order of Doctors of the neighboring territory reduces the ability of emergency doctors to work on both sides of the Franco-Spanish-Andorran borders.

## Our proposal

- Signing local agreements for cross-border health cooperation between Andorran and French States and the Spanish Regions,
- Signing of local agreements between the different professional Orders of Doctors (french departments and spanish provinces)
- finally with the establishment of a technical pilot between the emergency services of the Perpignan Hospital (France) and the Crossborder Hospital in Puigcerdá (Spain).
- During this last phase, the local experiences of the emergency services will be capitalized.

Thanks you
